INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/02013

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	De	scription, Pages								
	1-2	21	as originally filed							
	Cla	laims, Numbers								
	1-2	21	received on 09.06.2004 with letter of 07.06.2004							
	Dra	awings, Sheets								
	1/8	-8/8	as originally filed							
2.	Wit lan	th regard to the lang guage in which the ir	Jage, all the elements marked above were available or furnished to this Authority in the ternational application was filed, unless otherwise indicated under this item.							
	The	ese elements were av	vailable or furnished to this Authority in the following language: , which is:							
		the language of a tr	anslation furnished for the purposes of the international search (under Rule 23.1(b)).							
			olication of the international application (under Rule 48.3(b)).							
			anslation furnished for the purposes of international preliminary examination (under							
 With regard to any nucleotide and/or amino acid sequence disclosed in the international application international preliminary examination was carried out on the basis of the sequence listing: 										
		contained in the inte	emational application in written form.							
		·								
	☐ furnished subsequently to this Authority in computer readable form.									
		The statement that to in the international a	the subsequently furnished written sequence listing does not go beyond the disclosure application as filed has been furnished.							
		The statement that the listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.							
1.	The	amendments have r	esulted in the cancellation of:							
		the description,	pages:							
		the claims,	Nos.:							
		the drawings,	sheets:							

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT**

International application No.

PCT/EP 03/02013

5. 🗆	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Claims Yes: Claims

1-21

No: Claims

2. Citations and explanations

Industrial applicability (IA)

see separate sheet

Reference is made to the following document:

D1: WO 01/43390 D2: US-A-6047051

D4: Universal Mobile Telecommunications System (UMTS; Multimedia Broadcast/Multicast Service (MBMS); Stage 1 (3GPPP TS 22.146 version 5.2.0 Release 5)

A. Citations and explanations made in respect of paragraph V:

- The present application relates to a method of managing point-to-multipoint 1. services in a mobile communication network (claim 1), a computer program arranged to carry out said method (claim 19) and an accounting entity implementing said method (claim 20).
- Document D1 cited in the ISR discloses a service management access node 2. providing a user profile, in which used services and occurred accounting information are administrated. According to this all users are billed individually and independently.
 - Document D2 cited in the ISR discloses a method for the implementation of charging in a telecommunications system. According to this method a contract message is sent to the customer terminal stating that the customer must make a contract on the selected service and the customer's acceptance of the contract is sent from the customer terminal to a dedicated billing server.
 - Document D4 cited in the ISR discloses just the possibility to collect charging information for the use of the multicast mode (e.g. to enable billing of providers).
- The technical problem addressed by the present application is how to provide a 3. point-to-multipoint service in a mobile communication network, which enables correct, flexible and secure accounting for users and service providers.
- The present application solves the above-mentioned technical problem according 4. to the subject-matter of claims 1, 19 and 20 by setting a user identifier in relation to a point-to-multipoint service and by sending this information to an accounting entity, which considers the number of subscribers that requested the service

and the provider of the point-to-multipoint service.

- The solution of the present application, as defined by the subject-matter of 5. independent claims 1, 19 and 20 is not taught or suggested by the available prior art references either alone or in combination. The prior art documents D1, D2 and D4 do neither show nor suggest sending a user identifier in relation to a point-tomultipoint service to an accounting entity and considering both the number of subscribers requesting the service and the service provider.
- 6. The requirements of Article 33 PCT are therefore considered to be fulfilled.
- B. Further remarks made in respect of the present application:
- The general statement in the description in lines 16 and 17 on page 1 (ie. 1. "...incorporated by reference...") should have been deleted, since the application should be self-contained.
